## **FREE HIGH SPEED WIFI CONNECTS THE POINT WITH GUESTS**

The Point Brisbane has strengthened its appeal to business travellers by offering complimentary, high speed Wi-Fi access with unlimited downloads to all guests.

"Customer research identified an emerging need for simple to use, fast Wi-Fi that keeps guests connected so we've just invested \$100,000 on an extensive IT upgrade that has enhanced performance and online security," said The Point's operator David Catterall.

Located at Kangaroo Point and managed by Best Management Group, the hotel was recently re-designed and now boasts 201 accommodation rooms and suites, meeting and event facilities with Brisbane skyline views and its own dedicated restaurant, Lamberts.

"The expansion embraced technology, dining and lounge facilities and focused on functionality and comfort," Mr Catterall said.

"Our customers appreciate a first class meal and a glass of wine before returning to the comfort of their room and the hotel now offers all this and more."

The Deluxe standard, full service property offers 24 hour guest services and room service, a gymnasium, outdoor pool and complimentary, secure car parking.

The Point's location close to the CBD, Fortitude Valley and South Bank Parklands provides inner-city views of the iconic Story Bridge, Brisbane River and CBD skyline.
